PRODUCE CATERPILLAR TRACTORS, ROTARY DIGGERS.

SECOND SERIES OF TRACTORS NEAR COMPLETION -- Ljubljana, Slovenski Porocevalec, 17 Apr 51

The "Industrial Motora" (Engine Industry) Enterprise in Rakovica recently built the first series of Yugoslav-made caterpillar tractors. They were distributed to farm work cooperatives and state farms.

The enterprise is now producing the second series of 50 tractors, which will be completed this month. The enterprise expects to make 1,500 tractors in 1952.

The enterprise has also begun to assemble tractors from parts imported from the Ansaldo Factory in Italy. These tractors are large caterpillar tractors for heavy work on farms, in lumbering, etc. When equipped with the proper machinery, they can be used as bulldozers. The enterprise is assembling four of these tractors per day. The first series of 70 such tractors will be completed by the end of April.

PRODUCES FIRST SERIES OF ROTARY DIGGERS -- Belgrade, Borba, 14 May 51

Krusevac, 13 May -- The "14 October" Factory in Krusevac will soon deliver the first series of six mechanical rotary diggers, which were completed in December 1950 but have been undergoing tests since that time. 'Ith the exception of imported ball bearings, all parts of the digger were made in Yugoslavia, the frame in Krusevac and the motors in Rakovica.

Belgrade, Borba, 13 May 51

The new digger can dig a trench 1,000 meters long in 9 hours, and replaces 800 workers.

IMPROVED CALCULATING MACHINE BEING PRODUCED -- Ljubljana, Slovenski Porocevalec, 4 May 51

The calculating machine factory in Zagreb has begun producing an improved type of machine, the No 3, which is greatly superior to the old model. With the adoption of new production methods, 1,500,000 dinars have been saved, and the enterprise has prospects of exporting the machines. The calculating machines each contain 1,400 different parts.

The Zagreb factory is now preparing to produce electrically operated calculating machines which will perform all four calculating operations. Serial production of these machines will continue at least 2 years.
